

SISS-24 *The 24th Scientific International Symposium on SIMS and Related Techniques Based on Ion-Solid Interactions*

June 18 (wed)-20 (Fri), 2025 | Himeji, Japan

Special Session Honoring Professor Jiro Matsuo

Celebrating His Outstanding Contributions to Secondary Ion Mass Spectrometry (SIMS)

Join us for the 24th SISS Conference, held near the UNESCO World Heritage site, Himeji Castle. This year's SISS will be held over an extended three-day schedule, from June 18-20, 2025. The conference will focus on SIMS and related techniques in ion-solid interactions, covering fundamentals, instrumentation, data analysis, and applications in fields such as semiconductors, industrial materials, biology, medicine, and geoscience.

This year's event will feature a special session honoring Prof. Jiro Matsuo, who will be retiring from Kyoto University in 2025, in recognition of his remarkable contributions to SIMS technology.

We look forward to welcoming you to this memorable event!
